## SUMMARY

---

Entry-level QA Engineer with 1.5+ years of frontend development experience in Angular, currently training in Software Testing through the Digital Egypt Pioneers Initiative (DEPI) and gaining hands-on QA experience through a Software Testing internship at SpaceTech. Skilled in manual testing, test case design, bug reporting, and API testing with Postman. My development background gives me a strong understanding of how applications are built, helping me identify edge cases, communicate bugs clearly, and collaborate effectively with developers.

## PROFESSIONAL EXPERIENCE

---

### Software Testing Trainee - Digital Egypt Pioneers Initiative (DEPI)

7/2026 – Present

- Studying Java programming fundamentals and Object-Oriented Programming, including control flow, loops, arrays, inheritance, polymorphism, and abstraction.
- Studying the ISTQB Foundation Level (V4) syllabus, covering testing fundamentals, test design techniques, and test management.
- Practicing manual testing through hands-on sessions, designing test cases and tracking defects using Xray.
- Learning database testing fundamentals (SQL-based data validation) and API testing fundamentals.
- Currently progressing toward test management activities in Agile environments, web automation testing (Selenium, TestNG, Cucumber), and prompt engineering.

### Software Testing Intern (SpaceTech)

7/2026 – 9/2026

- Analyzed requirements and user flows to identify test scenarios.
- Designed and executed manual test cases covering positive, negative, and edge cases.
- Performed functional, regression, and end-to-end testing.
- Reported and documented bugs with clear steps to reproduce, expected and actual results.
- Retested reported issues and performed regression testing after fixes.

### Front-End Developer (Freelance)

10/2025 – 9/2026

- Built and tested responsive UI components with Angular 19, Tailwind CSS, and PrimeNG, validating features and API responses before deployment.
- Followed component-based architecture and clean code practices while collaborating within a team via GitHub.

- Developed responsive UI components using Angular and TypeScript, translating Figma designs into functional interfaces.
- Performed manual testing on implemented features, documented UI/functional defects, and worked with the QA team to resolve them.

## SKILLS

---

**Testing:** Manual Testing, Test Case Design, Bug Reporting, API Testing (Postman), Regression Testing, End-to-End Testing

**Tools:** Jira, Xray, Postman, Git, GitHub, Chrome DevTools

**Programming:** Java (OOP Fundamentals), JavaScript, TypeScript

**Frontend Development:** Angular, HTML5, CSS3, Tailwind CSS

**Basic Knowledge:** SQL, Agile & Scrum

**Currently Learning:** ISTQB Foundation Level (V4) Certification, Web Automation Testing (Selenium, TestNG, Cucumber)

## PROJECTS

---

### Fresh Cart E-commerce QA Testing

[GitHub-Repo](#)

- Designed and executed 101 manual test cases across 4 modules: Login, Register, User Flow, Checkout.
- Identified and reported 17 real bugs using Jira.
- Applied Boundary Value Analysis (BVA), Equivalence Partitioning, and End-to-End Testing.
- Documented full testing process on GitHub.
- Suggested 4 UX improvements.

### API Testing Project (Postman)

[GitHub-Repo](#)

- Tested REST APIs using Postman (GET, POST, DELETE requests).
- Validated status codes, response bodies, and automated assertions.
- Covered positive, negative, and error-handling scenarios. • Used Postman collections and environments for organized API testing.

## EDUCATION

---

**Bachelor's degree in business information systems Faculty of Commerce and Business Administration – Helwan University (2020 – 2024)**

## LANGUAGES

---

**Arabic - Native      English - Very good**
